

The biggest problem of people with disabilities is not adapted living environment, limiting their independence and integration into society.

According to the legislation of LR, adaptation of the living environment for disabled needs is one of the important thing for social integration of disabled people.

One of our providing service is production of custom furniture for disabled from wood, iron and combined

We try to take care about the good quality of rest for disabled, because these people need more public support to achieve the same living conditions as

other citizens.

Also we produce equipment and other facilities to improve the movement of people with disabilities.
